Flat-Free Tires

For Carts, Hand Trucks, Sprayers, Wheelbarrows, etc.

- **Capacity**
Same as pneumatics
- **Durability**
Outer skin is tougher than pneumatics
- **Performance**
Designed to perform just like a pneumatic tire with the benefit of NO FLATS!

How Much Do Flats Really Cost?

Cost per flat tire: **\$30.00**
(labor, parts, downtime, etc.)

Number of flats per year: **4**
(average varies by region)

Total Cost: **\$120.00**
(pneumatic tires)

If you know the hassle of a flat tire, then you need our new Flat-Free Tire. These tires are Maintenance Free and mounted on heavy-duty steel rims with shielded ball bearings. You'll never have to add air or fix a flat.

Flat-Free Tires are made of amazing microcellular polyurethane foam which is comprised of trillions of tiny air pockets - eliminating flats, while creating the bounce and load handling characteristics of conventional air filled tires. Polyurethane, unlike rubber, is not affected by damaging UV sun rays.

- **Outer Skin:**
The non-marking tough outer skin is more than twice as strong as rubber. It is also abrasion, chemical and ozone resistant.
- **Performance:**
Flat-Free Tires look and feel like air filled tires. They are designed to mimic air filled tires. Best of all they never go flat and they are more than two times stronger than rubber tires.
