YARD SWIMMERS

The Yard Swimmers are designed to swim with the wind. They sway back and forth by gracefully catching the wind with their tails creating a peaceful swimming motion. Each fish comes with a colored glass eye that catches the light from different angles as the fish swims. Yard Swimmers were designed with the outdoor elements in mind. Over time, rusting will occur but this only adds to the aesthetic beauty, making each fish truly one-of-a-kind.

GALLERY ART GLASS

Get 40-50% retail margins selling these unique garden gift items with the highest quality, 3-dimensional stained glass for home and garden.

Featuring original designs and including fresh, whimsical themes and traditional favorites. Genuine Tiffany window glass must be cut from large sheets, smoothed, wrapped in copper then hand-assembled into our unique designs. This is not painted glass - each colored part is individually cut and layered. All metal surfaces are then covered with automotive quality electroplating in either copper or nickel for strength and luster. Our garden accessories will never fade and are waterproof and weatherproof.
