### All Purpose 20-20-20

Considered the industry standard of general purpose fertilizers by professional growers. It feeds both through the roots and the leaves. This formula of nitrogen, phosphorus and potassium provides fast green-up and rapid leaf expansion. Recommended for use on all your indoor and outdoor plants.

### Blossom Booster 10-30-20

Designed to produce more flowers and brighter colors on all indoor and outdoor plants. Feeds through both the roots and the leaves. Trusted by many professional growers as a tool to fill out a blooming container. This formula will produce the same GREAT results for you at home.

### Acid Special 17-6-6

Helps to reduce soil pH which allows your plants to better utilize iron and other trace elements for overall plant growth. Perfect for greening up all acid loving garden and houseplants. This product will promote lush vegetative growth and better blooms through its enhanced nutrient package, which includes elevated levels of iron and sulfur.

### Houseplant Special 15-30-15

Traditional indoor houseplant fertilizer designed for use on all foliage and flowering plants. Used in a constant feed system, it keeps the nutrition levels constant preventing nutrient stress from over or under feeding. This product can also be used outdoors as a transplant solution and as a blossom booster for all flowering plants.

### Orchid Special 30-10-10

This formula emphasizes the vegetative growth stage (leaves) and will assure that the plants requirements will be satisfied as the new leaves develop and mature. It is an excellent root and foliar feeding product, not only for orchids, but also for all turf and ornamental grasses.

### African Violet 12-36-14

High quality nutrients are formulated to deliver the perfect blend to produce deep green foliage, stocky stems, strong root and bud development and colorful blooms. Excellent formula for both top and bottom feeding containers. Root feed only.

### Hydrangea Blue 7-3-3 With Micronutrients and Aluminum Sulfate

This combination formulation of nutrients and acidic elements, along with important addition of aluminum sulfate, will help plants produce deep blue flowers.

### Petunia Feed 20-6-22

Designed for plants that do not take up iron efficiently in the root zone. Contains an enhanced micronutrient package that will produce lush green plants in any growing condition. Iron hungry plants include petunia, calibrachoa, bacopa, verbena, vinca and salvia. This low phosphorus formulation keeps plants fuller. Effective in hanging baskets and containers that are watered often.

### Citrus Feed 20-10-20

Combination of nutrients needed by plants in the citrus group. This formula with enhanced micronutrient levels will produce vibrant green leaves, strong branches and more fruit. When used as directed, Jack's Citrus FeED will allow your plants to uptake the nutrients through both its roots and leaves.

### Tomato Feed 12-15-30

Formulated for vigorous plant growth from roots to green foliage, abundant flowering and fruit set for all tomato varieties and blooming vegetables. Contains a micronutrient package and Magnesium for improved feeding results under diverse soil and growing conditions. It also includes Calcium, an effective nutrient to help prevent blossom end rot.

## INFO STICKS

Info Sticks hold picture labels either vertically or at 45°. Label is very easily and quickly clipped into position. Over non-return prongs. The label is securely held and will not spin, be blown or pulled out easily. The label pivots on prong and the customer can read the back of the label without pulling the stick out of the soil.
